

Jubilee USA Successes  
December 2019

We moved the White House and IMF to support debt relief for Somalia.

We cut \$8 billion of Puerto Rico's debt.

Moving Debt Relief for Somalia

Jubilee USA is moving forward Somalia debt relief and won IMF, White House, Treasury and State Department support. Of the \$4.6 billion debt, \$1 billion is held by the US and canceling it requires an act of Congress.

Working with Republicans and Democrats, we'll win Somalia relief to support government accountability and finance social programs, infrastructure and women's empowerment initiatives.

The president of the United Nations asked Jubilee to share our work at the UN General Assembly with the world's Presidents and Prime Ministers. We organized the highest level event during the IMF meetings for finance ministers and world leaders.

Winning Corporate Transparency

A decade ago, Jubilee USA found out that debt relief and development aid was stolen by dictators and corrupt officials through shell companies. Thanks to our continued efforts together, our Jubilee USA legislation to stop anonymous shell companies can now become law.

We passed our bipartisan Jubilee Corporate Transparency Act through the House in October and won White House and Treasury support. The legislation protects debt relief and stops human traffickers. Now we need to pass the legislation in the Senate.

Pope Francis lifted our analysis on debt, tax, trade and transparency issues.

Our Jubilee USA efforts to end poverty were covered in tens of thousands of newspapers, magazines and television programs around the world.
